PROFILE

A highly skilled and motivated frontend developer with two years of professional experience, seeking a challenging position to contribute my expertise in creating responsive and user-friendly web applications. With my strong technical skills and collaborative approach, I am committed to delivering high-quality work that meets and exceeds customer expectations. Whether working independently or as part of a team, I am always looking for opportunities to take on new challenges and develop innovative solutions that drive business success.

WORK EXPERIENCE

Software Engineer

TUTORT ACADEMY 08-2022 - Present

- Developed the company's web app tutort.net by creating flexible, object oriented, reusable components in Next JS using relevant Data Structures.
- Completed the minimum project requirements well on time by prioritizing the important tasks.
- Communicated regularly with the CTO to update the progress, and Analyse and gather requirements, considering the customer's perspective and wrote Algorithms to solve various problems.
- Created an eye catching yet simple User Interface for best possible User Experience.
- Tested the app thoroughly and timely resolved the issues encountered.
- Improved the SEO learning and using prerender service to respond differently to bots and users.

Software Engineer

TECHNOCRONIES 04-2021 - 08-2022

- Developed and maintained responsive web applications using HTML, CSS, and JavaScript.
- Improved performance and user experience by implementing frontend functionality with React.
- Worked with the design team to translate design mockups into functional web pages.
- Code reviews were conducted, and constructive feedback was provided to team members.
- Coordinated with backend developers to integrate frontend components into the server-side architecture.
- Optimized web applications for performance and scalability.
- Improved cross-browser compatibility to ensure a consistent user experience.
- Implemented responsive design techniques to enhance mobile user experience.
