Web Developer   Portfolio Github LinkedIn

PROFESSIONAL SUMMARY

Experienced React Developer proficient in the MERN stack. Skilled in front-end development, state management, and building responsive user interfaces. Strong ability to collaborate with cross-functional teams and adapt to evolving project requirements. Passion about leveraging modern technologies to create innovative solutions and enhance user experiences.

SKILLS

HTML	Java Script	Tailwind Css	Mongo DB
CSS	React Native	Express JS	PostgreSQL
SAAS	React JS	Next Js	Node JS

WORK EXPERIENCE

React Developer, TUTORT ACADEMY   **Aug 2022 - Present**

- Collaborate with the design and backend teams to develop server-rendered React applications using Next.js, ensuring optimal performance and SEO friendliness.
- Implement efficient page routing and navigation using Next.js routing system, ensuring smooth transitions between pages and a seamless user experience.
- Utilize Next.js SSG capabilities to generate static versions of pages at build time, improving performance and reducing server load for frequently accessed content.
- Ensure that web applications are accessible to all users and optimized for search engine visibility, following best practices for web accessibility (WCAG) and SEO.
- Identify and implement optimizations to improve application performance, including code splitting, lazy loading, image optimization, and CDN caching.

Mern Developer, TECHNOCRONIES   **Mar 2021 - Aug 2022**

- Developed and maintained responsive web applications using HTML, CSS, and JavaScript
- Increase website performance by 20% though through optimization of meta tags and increase user experience by implementing frontend functionality with React.
- Coordinated with backend developers to integrate frontend components into the server-side architecture
- Worked with the design team to translate design mockups into functional web pages.
- Code reviews were conducted, and constructive feedback was provided to team members.
- Improved cross-browser compatibility to ensure a consistent user experience.
- Implemented responsive design techniques to enhance mobile user experience.
- Optimized web applications for performance and scalability
